Butler Marketing

Quality Hardware for Cabinets & Millwork

Dear Customer:

It is with pleasure that we offer you our catalogue. It illustrates products that we generally stock but we also accept orders for non-stocked items. On the main page of our website you can link directly to many of our suppliers to see what is available, gain additional information and see what we may be able to special order for you.

We look forward to serving you and thank you for your support.

Address:
#6 - 11771 Horseshoe Way
Richmond, BC V7A 4V4
Phone: 604.279.8228
Fax: 604.279.8242

Butler Marketing

Quality Hardware for Cabinets & Millwork

General Information

1. **Hours of Operation:**
   Our sales desk is open Monday through Friday from 8:00 AM to 4:30 PM (local time).

2. **How to Contact Us:**
   Telephone, fax numbers and e-mail addresses are listed on the previous page. Please feel free to drop in and see our showroom and warehouse whenever you are in our area.

3. **Minimum Orders:**
   We are a wholesale distributor to manufacturers. In addition, we supply product to hardware retailers, and support their businesses by **not** selling retail. Our minimum order is $25.00 and we may apply a $5.00 service charge to smaller transactions.

4. **Terms of Sale:**
   Our terms are net 30 days. All invoices over 60 days will be considered delinquent, and in-house orders will be placed on hold until the balance of the account is brought current with our terms. Overdue accounts may be subject to interest charges of 1% per month, applied to the overdue balance. Credit Card payments are accepted at time of sale.

5. **New Accounts:**
   We invite you to complete our credit application form. Upon submission, we will advise you of our position in a timely manner. Until credit has been established, we would be selling on a C.O.D. basis.

6. **Returned Goods Policy:**
   If you wish to return goods to us, please advise us first and upon our approval, we may issue a return goods number. This will ensure that returned goods are properly received and credited to the correct account. Full credit will be allowed to cover errors in shipping or defective product. Returns made for any other reason may be subjected to a restocking charge of 20%. A copy of the original invoice may be required.
   Obsolete, discontinued or special order products are not returnable

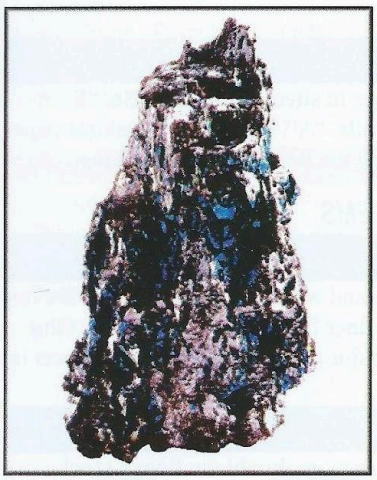
Abrasive Grain Types

Aluminum Oxide: Man Made Abrasive

Aluminum Oxide

The most popular of all abrasives, aluminum oxide is **extremely tough** and has a wedge shape for high speed penetration of tough materials without excessive shedding or fracturing of the grain. Aluminum oxide is suited particularly well for grinding high tensile strength materials such as carbon steels, alloy steels, tough bronze and hard woods. Aluminum oxide is used whenever toughness (the ability to resist fracturing) is the main consideration. Aluminum oxide products are typically brown in color.

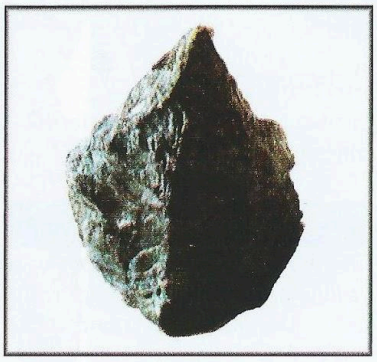
Silicon Carbide: Man Made Abrasive



Silicon Carbide

Next to diamond in hardness, silicon carbide, characterized by its sharp sliver-like grains makes it **superior for its ability to penetrate with light cutting pressures**. It is primarily used for grinding nonferrous materials such as brass, copper, bronze and aluminum. Other applications of silicon carbide include grinding of glass, wood, rubber and plastics. It is used also to finish polyurethanes, primers, lacquers and sealers. Silicon carbide is the grain of choice for certain finishes on stainless steels. Silicon carbide products are typically black in color.

Zirconia Alumina: Man Made Abrasive



Zirconia Alumina

A blocky shaped grain that has a micro-crystalline structure, and is characterized as being **self-sharpening**. This self-sharpening characteristic gives zirconia alumina **good life on heavy stock removal applications**. Zirconia alumina is well suited for heavy grinding of metals and for planing operations for wood because of its controlled fracturing that exposes new, sharp cutting edges. Available in grits 24 through 150. Zirconia alumina products are typically blue or green in color

Garnet: Natural Abrasive

Garnet is a **natural abrasive** made by crushing garnet crude. Garnet is a soft mineral and is not as hard, nor as durable as the various man made abrasives. Garnet fractures along the cleavage lines of the crude crystals, exposing very sharp cutting edges as the grains fracture. Garnet is used in the wood working industry, particularly in finishing operations. Garnet is the recommended abrasive if you are getting burning of the wood with other abrasives. Garnet is not suitable for use on metals.

Backings

"J" Wgt. Cloth:

The most flexible, and lightest weight of the cloth backings, used extensively for **contour grinding**. Available in aluminum oxide, open and closed coat, and silicon carbide, closed coat.

"X" Wgt. Cloth:

A heavier backing **used on most abrasive belts** for all types of applications where you need a **stronger backing** or where extreme flexibility is not required. Available in aluminum oxide, open and closed coat, silicon carbide, closed coat.

"X" & "Y" Wgt. Polyester:

Synthetic backings designed for their **extreme strength**, widely used in **severe grinding** and wide belt applications for metal, glass, and wood working. Polyester backed belts are waterproof, and can be used either wet or dry, and the belts are washable. Available in aluminum oxide, open and closed coat, silicon carbide closed coat, and zirconia alumina closed coat.

Paper Backings:

Available in "A", "B", "C" & "D" weights for use in **sheet, rolls** and **disc**, "E" & "F" weights for use in **sheets, belts, disc, and rolls**. "A" weight is the lightest paper backing with the range going to "F" weight being the heaviest paper backing.

Bond Systems

Glue Bonds:

Glue bond systems use animal hide glues, alone and with fillers. Glue bonds are not as resistant to heat as resin bonds, but do give a finer finish than resin bonds. Glue bonds are more flexible than resin bonds. The major usage of glue bond products is for sheets used in hand sanding operations.

Resin Bonds:

Resin bonds offer **greater resistance to heat**, are more durable in **heavy stock removal applications** and provide the best all-around bond system. Resin bonds have a tendency to provide a harsher, more scratchy finish in fine grits and is more difficult to polish out. There are two types of resins used for manufacturing coated abrasive products. Urea resins are a weak inexpensive resin that is not much better than a glue bond system. Phenolic resins are very strong and heat resistant. Most abrasive belts utilize the superior phenolic resin bond system.

Abrasive Grain Coverage

The manner in which the abrasive grains are distributed on the backing is referred to as its "Coating". The two levels of abrasive grain density are **open coat** and **closed coat**.

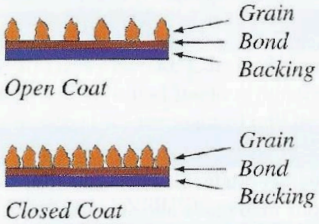
Open Coat:

Abrasive grains cover approximately **50% - 60% of the coated surface**. Open coat products generally offer greater flexibility, faster cutting, coarser finish and provide a greater resistance to loading. Open coat products are used **widely for woodworking applications,** with limited applications for metal.

Closed Coat:

Abrasive grains cover **100% of the coated surface**. The greater number of abrasive grains normally results in a better finish and a higher amount of stock removal during the useful life of the product. If loading is not a problem, a closed coat product will give you superior life and lower cost. Closed coat products are widely **used in metalworking and woodworking applications**.

Abrasive Grain Spacing



Abrasive Belts

Standard Belt Splices

Standard Splices

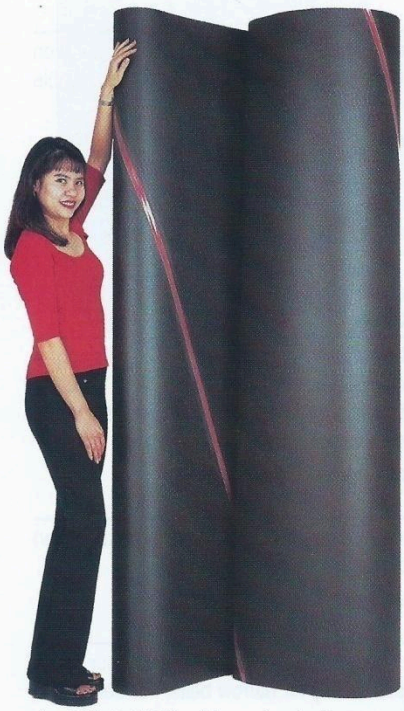
Narrow Belts - All Grits
- Butt Splice - **Straight Cut 67°** our Standard Splice
- Butt Splice - **Pascolock Cut 67°** available at no extra cost
- Lap Splice 67° available

Wide Belts 24 - 50 Grit
- Butt Splice - Straight Cut 67°

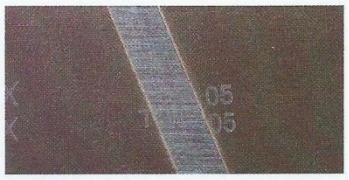
Wide Belts up to 67" wide, 60 Grit & Finer
- Butt Splice - Pascolock Cut 67°
- Butt Splice - Straight Cut 67° available

Wide Belts Zirconia
- Butt Splice - Straight Cut 67°

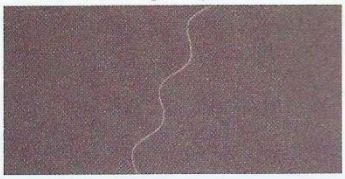
Tape-On-Top Splice
- All Materials + 7% additional
  The perfect bump free splice, can only be used with a platen or solid steel contact wheel.



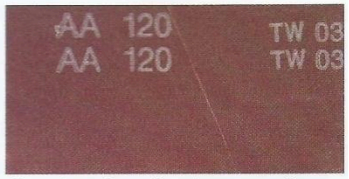
An 80" X 150" wide resin cloth sectional belt with Tape-On-Top Splices. We make belts up to 128" wide



Butt Splice, Straight Cut: strong bi-directional tape splice. Our standard splice for narrow belts

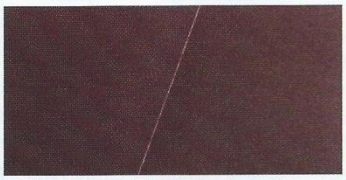


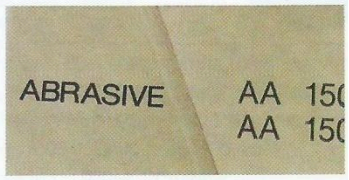
Pasco Lock Splice: strong bi-directional tape splice, used mainly to improve finish on wide belts which reduces hinging and eliminates splice marks. Also available for narrow belts.



Lap Splice Top Skieved: may only be run in one direction. Best for shape sanding with "J" Wgt. clolth belts.

Tape-On-Top Splice: ONLY *for applications with* either platen or steel contact wheel. The abrasive grain is removed and the tape is applied to the grain side of the belt. *This provides a bi-directional splice that is thinner at the splice than the rest of the belt.*





1/4" Lap Splice: ONLY *available on paper wide belts.* Our new belt splicing technnology enables us to manufacture 1/4" lap splices on paper belts with a ± 0.000 tolerance. With more companies seeing the advantages of paper belts, PASCO has become a leader in providing "bump free" paper belts.

The vast majority of abrasive belts today utilize a taped joint, commonly referred to as a "butt joint". Butt joints offer a very strong joint and consistency relative to the thickness of the joint. These types of joints have been instrumental in helping the coated abrasive industry to increase the automation process of manufacturing abrasive belts. Lap joints are rarely used today except for shape sanding, where it is superior to a butt joint, and some applications of wide belts. Most splices are cut at a 67° angle to the side of the belt.

Portable Belts

Grits In Stock (x)

Size (")	Material	36	40	50	60	80	100	120	150	180
3 x 21	XW341	x	x	x	x	x	x	x	x	x

- inquire if an x does not appear as stocked … new items are added as requested

Materials:

B317:

An aluminum oxide “F” weight open coat resin paper product. This product has an antistatic treatment which helps eliminate or minimize dust build up in the machine. Suitable for medium and fine sanding of hardwoods.

B347:

An aluminum oxide “F” weight closed coat resin paper product. This product has an antistatic treatment which helps eliminate or minimize dust build up in the machine. Suitable for medium and fine sanding. This is the recommended product on the final head of the multiple head machines for longer life and better finish than open crated product. Use this material on all grit sizes finer than 150 grit.

Paper Sheets

Grits in Stock (x)

Size (“)	Material	40 grit -1500 grit	Pkg

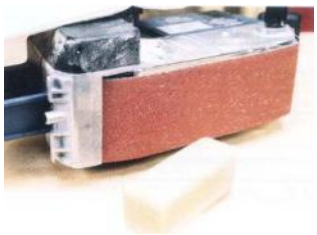
- eXtreme Premium Sanding Discs
- Ceramic, C-Weight Latex Paper Backing, Open Coat
- Premium sharp ceramic grain for best sanding result
- Consistent finish with 2X life over conventional discs
- Anti-clogging with stearate coating resists loading
- Maximum performance relative to cost

Belt Cleaners

Item #	Description	Pack.
01H-20000	Rubber Cleaning Block 2” x 2” x 8”	1
01H-20001	Rubber Cleaning Block 1-½” x 1-½” x 8”	1

- for use on edge sanding and portable belts only;
- DO NOT use on wide belts as this can be extremely hazardous.



Graphite Rolls

Item #	Description	Pack.
01H-30000	Graphite Roll 6" x 10 yard	1
01H-30008	Graphite Roll 8" x 10 yard	1

- other widths and lengths available to special order
- Graphite coated canvas will extend the life of your belts by reducing heat and friction

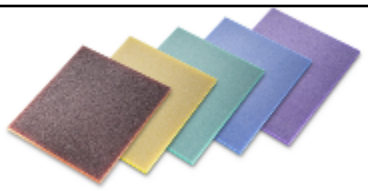
Sanding Blocks/Pads

Siasponge Sanding Blocks - 2-¾" x 4" x 1"

Item #	Description	Grit	Colour	Hard/Soft
01J-11002	Siasponge Block	36 (Coarse)	Red	Hard
01J-11005	Siasponge Block	60 (Medium)	Orange	Soft
01J-11005H	Siasponge Block	60 (Medium)	Orange	Hard
01J-11007	Siasponge Block	100 (Fine)	Yellow	Hard
01J-11011	Siasponge Block	180 (Superfine)	Green	Hard
01J-11012	Siasponge Block	220 (Ultrafine)	Blue	Soft
O1J-12007	Combination Block	100 (Fine)		

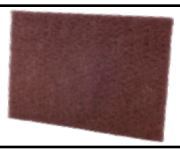
Siasponge Flat Pads - 4-½" x 5-½" x 3/16"

01J-20280	Siasponge Flat Pad	60 (Medium)	Orange
01J-20500	Siasponge Flat Pad	100 (Fine)	Yellow
01J-20800	Siasponge Flat Pad	180 (Superfine)	Green
01J-21000	Siasponge Flat Pad	220 (Ultrafine)	Blue
01J-21500	Siasponge Flat Pad	320 (Microfine)	Violet



Hand Pads - 6" x 9"

01J-30000	Hand Pad 6"x9"	Gen. Purpose	Green
01J-31000	Hand Pad 6"x9"	Very Fine	Maroon

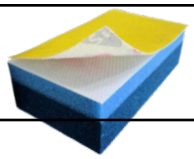


Siasponge Flex Pad - 4" x 4-¾" x ½"

01J-40002	Siasponge Pad	36 (Coarse)	Blue
01J-40005	Siasponge Pad	60 (Medium)	Blue
01J-40006	Siasponge Pad	80 (Medium)	Blue
01J-40007	Siasponge Pad	100 (Fine)	Blue
01J-40010	Siasponge Pad	180 (Superfine)	Green
01J-40011	Siasponge Pad	180 (Superfine)	Blue
01J-41011	Siasponge Pad	180 (Superfine)	White

Siafast Handblock - 2-¾" x 5"

1J-13000	Handblock Siafast	(double density)



Miscellaneous Sanding

Siaflex 1948

Item #	Description	Size	Grit	Pack.
01J-14080	Siaflex 1948	2-¾" x 5"	80 grit	100
01J-14100	Siaflex 1948	2-¾" x 5"	100 grit	100

Does the name Pavlov ring a bell?

General Information

Appearance of Individual Pieces of Veneer

Veneer Cuts

The way in which a log is cut in relation to the annual rings determines the appearance of veneer. The beauty of veneer is in the natural variations of texture, grain, figure, color and the way it is assembled on a door face.

Faces will have the natural variations in grain inherent in the species and cut. Natural variations of veneer grain and pattern will vary from these illustrations.

These are representative drawings of real wood veneers. Involve your woodworker early in the design and selection process.

Flat Cut (Plain Sliced)

Slicing is done parallel to a line through the center of the log. Cathedral and straight grained patterns result. The individual pieces of veneer are kept in the order they are sliced, permitting a natural grain progression when assembled as veneer faces.

Quarter Cut

A series of stripes is produced. These stripes vary in width from species to species. A natural distribution of ray fleck (flake) is a characteristic of this cut in red and white oak.

Rift Cut

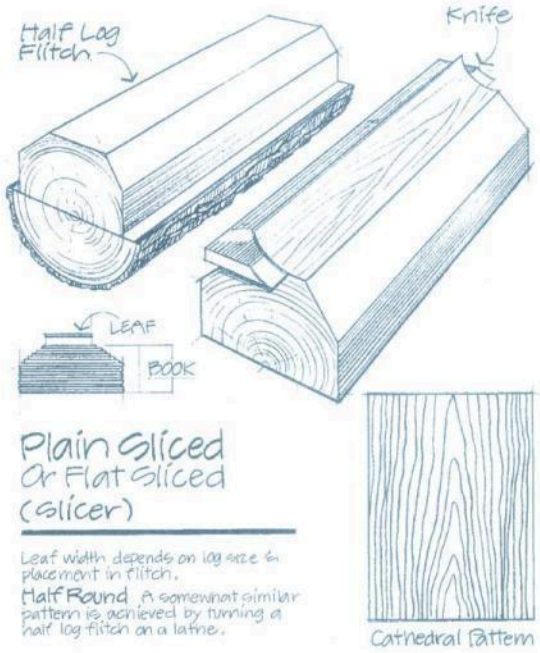
The cut slices slightly across the medullary rays, accentuating the vertical grain and minimizing the "fleck." Rift grain is restricted to red and white oak.

Comb Grain

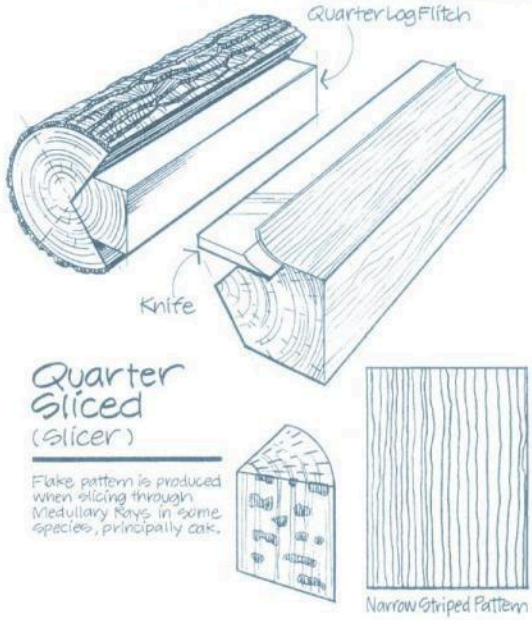
Limited availability. This is a rift cut veneer distinguished by the tightness and straightness of the grain along the entire length of the veneer. Slight angle in the grain is allowed. Comb grain is restricted to red and white oak. There are occasional cross bars and fleck is minimal.

Rotary

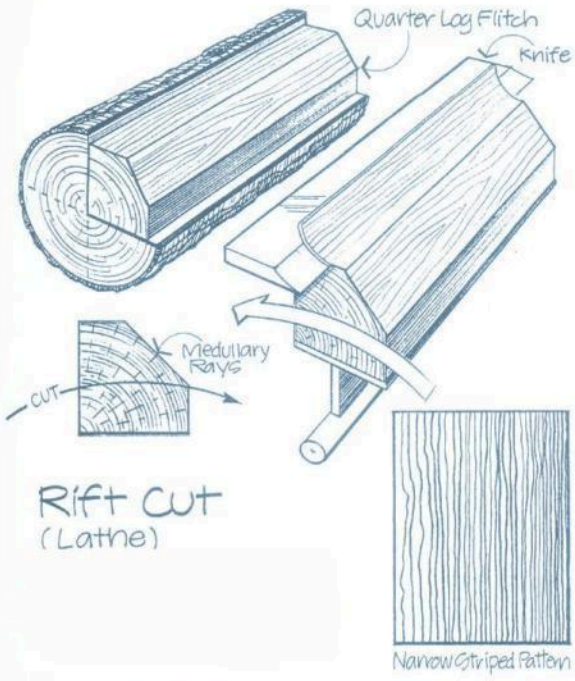
This cut follows the log's annual growth rings, providing a generally bold random appearance.



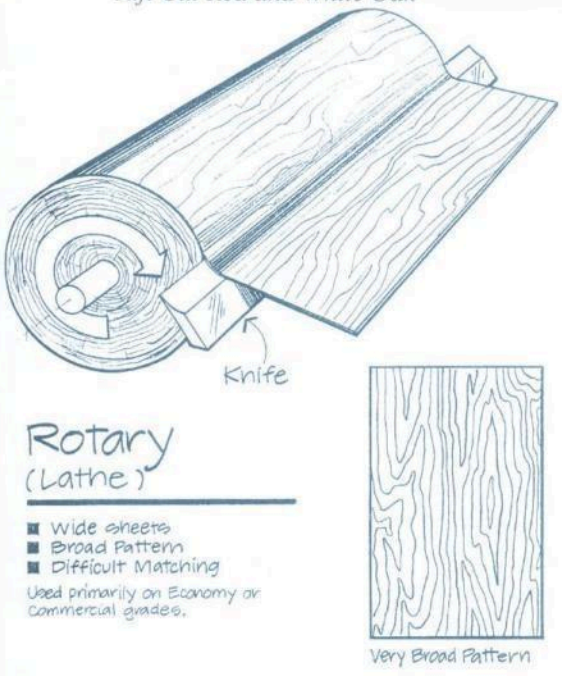
Flat Cut: Plain Sliced



Quarter Cut Red and White Oak



Rift Cut Red and White Oak



Rotary Cut

Wood Veneer Sheets

Item #	Description	Size
Veneer with self-adhesive backer		
04A-11828	Flat Cut Maple self-adhesive	24" x 96"

- Silentia – with the concealed soft close mechanism, allowing a 3-5 second closure from 30° with no hesitation
  For a demonstration video please go to:
  https://www.youtube.com/watch?v=c5HDY-5XqYU
- PUSH – a push-to-open hinge eliminating the need for door pulls and now the new Titanium finish to complement the darker wood tones, while providing ultimate functionality and increased corrosive strength

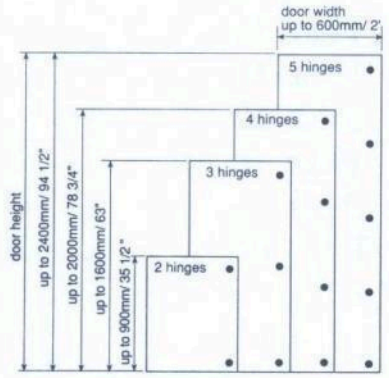
Visit Salice.com > Products > Hinges
to see all the hinge products available

Recommended Number of Hinges per Door

The number of hinges required depends on the size, weight and quality of the door. The distance between the hinges should be spaced as wide as possible. Use the diagram below to determine number of hinges needed.

For doors to 24" wide, weighing up to
20lbs. - 2 hinges
20 - 40 lbs.- 3 hinges
40 - 60 lbs.- 4 hinges

These recommendations are for doors without accessory attachments only.



Exceptions to number of hinge recommendations

- In abusive environments such as schools and hospitals, additional hinges should be added if doors are near the border line of size or weight chart.
- In abusive environments, it is best to keep doors to a maximum of 508mm (20") in width. This prevents undue leverage against the doors.
- In abusive environments, use an institutional type of hinge such as the GRASS 950 Hinge series.

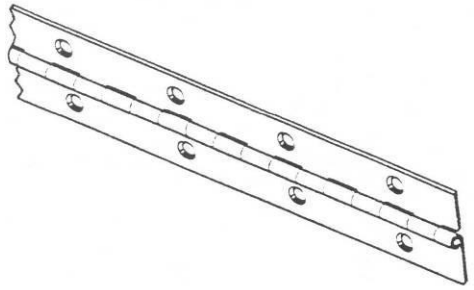
- hinges are pierced and countersunk for #5 screws every 2"
- thickness is .030 except HD are .040"
- other sizes and finishes are available (for example …
  …architectural hinges up to 4-½" open width)

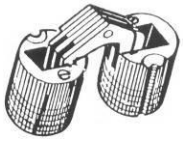


The precut (30") lengths provide a labour-saving, premium quality finished product for lazy susan kitchen corner cabinets.

Miscellaneous Hinges

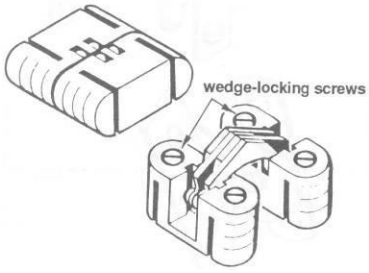
Item #	Finish	Description		Sold By:	Pack:
07C-21012	Brass	Concealed hinge 12mm x 27mm long	Each	48	
07C-21014	Brass	Concealed hinge 14mm x 31mm long	Each	24	

- machined solid brass with steel linkage
- drill mm size holes to exact depth
- 16, 18 and 24mm also available



Item #	Finish	Description	Sold By:
07C-21100	Black	Concealed hinge / steel linkage	Each

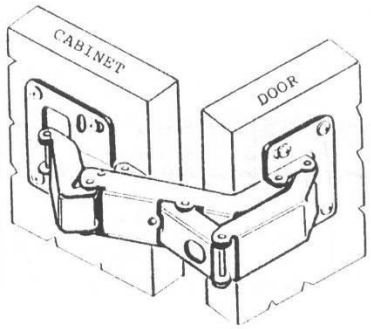
- nylon body
- screwless -application
- incorporated set-screw expand
- wedge locks to secure in wood
- make mortise with 12mm bit



Miscellaneous Hinges

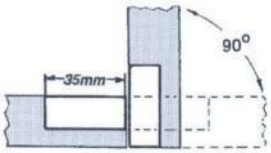
Item #	Finish	Description	Sold By:
07C-21105	Nickel	Surface mount concealed hinge 150°	Each

- 150° door opening without drilling holes and without using mounting plates
- one hinge fits all door conditions
- self-closing
- heavy-duty, case hardened steel



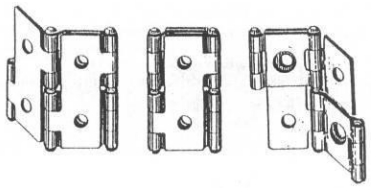
Item #	Finish	Description	Sold By:
07C-60010	Brown	Drop flap hinge	Each

- flap opens flush with inside shelf
- fits flush in door and shelf surfaces
- completely concealed from exterior



Item #	Finish	Description	Sold By:
07C-20351	Brass plated	Double action hinge for 1” to 1-⅛” panels	Each
07C-20352	Brass plated	Double action hinge for 1-⅛” to 1-¼” panels	Each

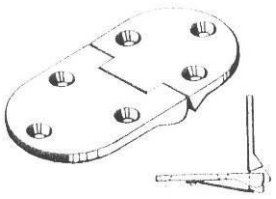
- steel folding screen hinge
- opens in both directions



Miscellaneous Hinges

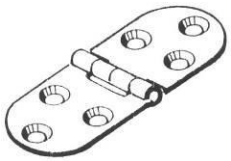
Item #	Finish	Description	Sold By:
07C-22000	Satin Brass	Butler tray hinge - square	Each
07C-22100	Satin Brass	Butler tray hinge - round	Each

- Butler tray hinge locks open in flat position and holds vertical at 90°
  (3" long x 1-1/2" wide)



Item #	Finish	Description	Sold By:
07C-22200	Brass	Flap Hinge H-205	Each

- flap hinge and sewing machine hinge
- 1-1/4" x 3/8"



Item #	Finish	Description	Sold By:
07C-60123	Steel, black	Internal self-balanced support	Each

- anti-slam lift-up support for toy chests, piano benches, etc. (S-57554L)

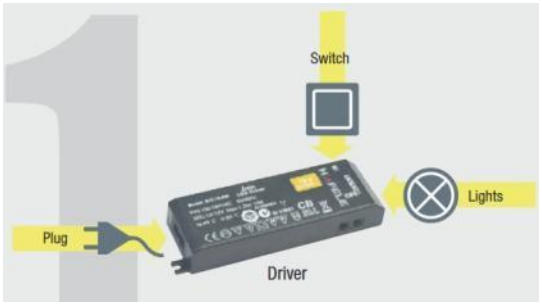
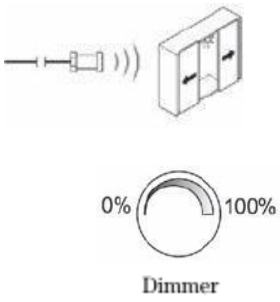
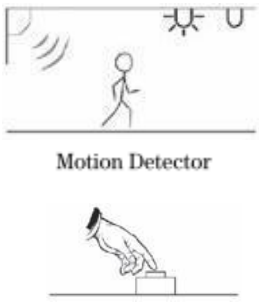
LED's (Light Emitting Diodes)

The ABC's of lighting technology

Advantages of LED's	Loox LED technology
Longer lasting LED lights have an extremely long service life of up to 25 years or more than 40,000 to 50,000 hours. **Insensitive** LED's have an extremely small and robust design. This makes handling easier during furniture construction and transport. **Low heat generation** Because of their extremely low power consumption, LED lights generate hardly any heat. This means that LED lighting systems are particularly suitable for displays. **Energy-saving** LED lights use an impressive 90 percent less power than conventional light bulbs! This means that they can be used to implement modern lighting scenarios in furniture, and still be in line with the energy saving trend. **Powerful** Modern LED lights are bright and have a saturated light colour. They achieve full brightness as soon as they are switched on. LED furniture lighting therefore has a lasting effect at the push of a button. **Rich in variants** LED lights are available in different colours, and can be designed as colour changing lights. This allows the light colour to be coordinate with furniture contents such as exhibits in the best possible way.	The Loox LED technology incorporates different power systems. A system is decided on by choosing the driver or a particular light. The choice of system is an important decision, because the driver that is selected can only be combined with lights from the same system. **Spoiled for choice in the 12 V system** The LED lights are voltage-controlled and connected in parallel in the 12 V system. The plugs on the driver can be freely allocated. 12 V lights are the most widespread at present. See page 9.2 **Powerful 24 V system** Technically speaking, the 24 V system is identical to the 12 V system, but has a considerably higher power level. 24 V lights can therefore be used when extremely bright lights are required. See page 9.3 **Spotlights in the 350 mA system** The LED lights in the 350 mA system are current-controlled and connected in series. This means that each plug has to be either occupied or bypassed. 350 mA lights provide extremely high light power and are particularly suitable for spotlighting. See page 9.4



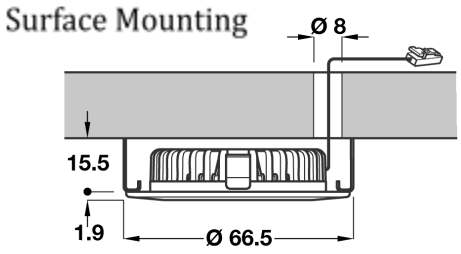


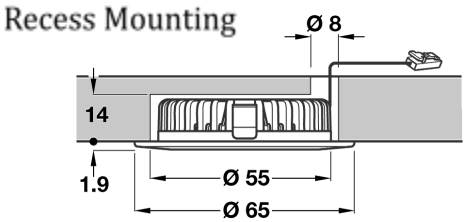


12V System

Loox LED 2020

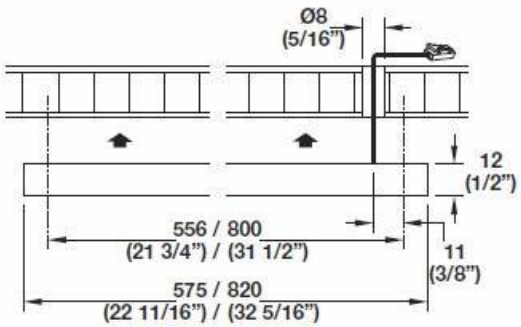
- Surface or Recess Mounting
- Particularly suitable for providing atmospheric lighting in shelving and any area
- Available in three colour temperatures (Kelvin)





Loox LED 2004

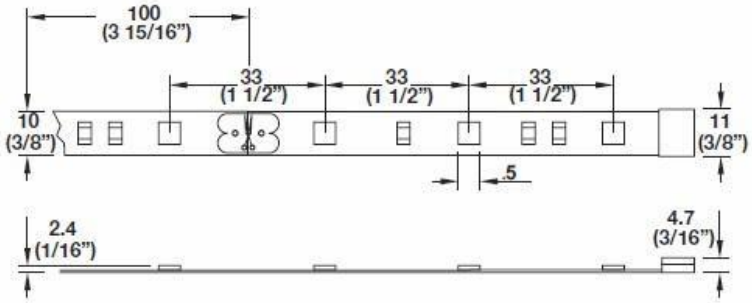
- Provides an interesting design element in decorative furnishing areas
- Compact design integrates into furniture almost invisibly



Loox LED 2015

LED Ribbon Light

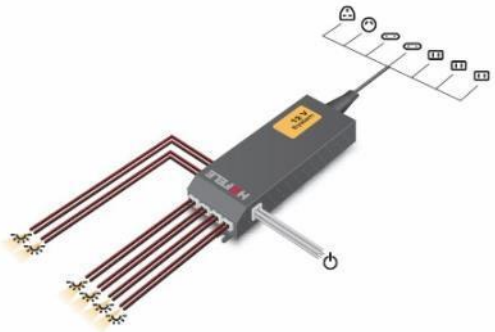
- Ideal for direct lighting of furniture
- Can be cut-to-size
- High Intensity light output



Loox LED Driver

Constant voltage 12V

- Suitable for all the world's
- With an integrated port for



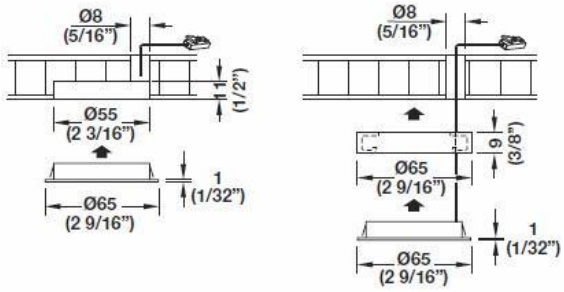
Driver
power systems
a wide selection of switches

24V System

Loox LED 3001

Recess Mounted Light

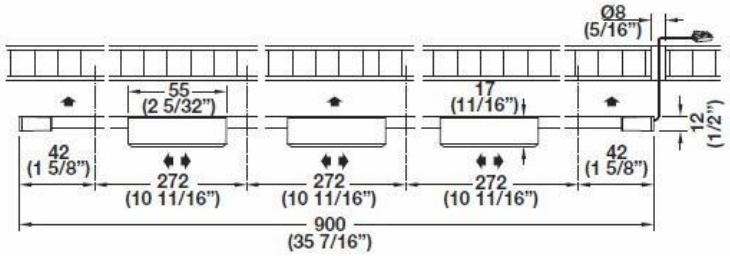
Enhances display cabinets and shelves
Can be surface or recess mounted
Two light colors provide options in design
Surface mounted ring is available



Loox LED 3006

Downlight

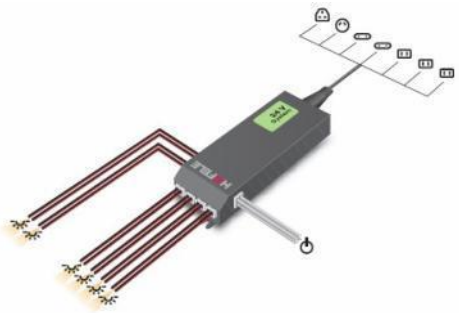
Perfect for illuminating work areas
Lights are easy to move without tools
(unit comes with 3 lights)
Can be cut to size
Maximum of 5 lights per strip



Loox LED Driver

Constant Voltage 24V Driver

Suitable for all the world's power systems
With an integrated port for a wide selection of switches

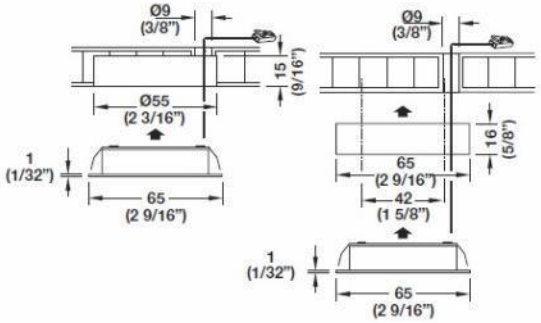


350mA System

Loox LED 4009

Recess Mounted Light, with 3 LED's

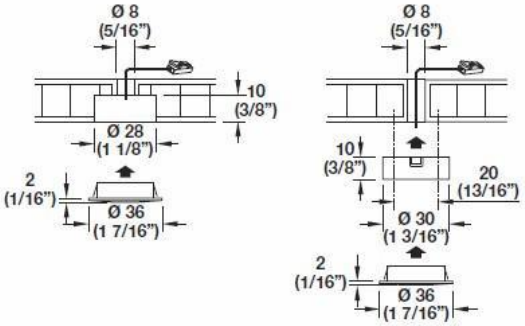
Generates powerful, direct light
Multi-functional for use in a variety of furnishings
Three different attachment options are available
Recommended as a replacement for Halogen puck lights
Round and triangular surface mounted housings available



Loox LED 4003

Recess Mounted Light, Square

Small and flat design easily integrates into furniture designs
The light spot decoratively illuminates objects and works as an effective sidelight



LED Driver

Constant voltage

Suitable for all the world's power systems
With an integrated port for a wide selection of switches

Ergonomic Products are supplied through Knape and Vogt
and all their products are readily available to us.

Further details can be found at
www.knapeandvogt.com Ergonomic Solutions Distribution Catalog

Volante Desktop Sit-Stand Workstation

The Volante Sit-Stand Desktop Workstation,
quickly and economically converts an existing
desk to a smooth and effortless sit-stand workstation.

Volante desktop sit-stand workstation

- Primary work surface can extend 20" above the desk
- Gas assisted infinite height adjustment range of 13.8"
- Large primary work surface, fits 2 x 24" monitors,
  KV monitor arms, Apple iMac or laptop with monitor
- Grommet hole for monitor arm or cable management
- 20° keyboard surface tilt, -10°/+10° for ergonomic typing
- Clip-on mouse fence and cable manager
- Supports 35 lbs. of technology
- Fits onto a 24" deep desk
- Ships fully assembled

Volante HD42 desktop sit-stand workstation

- Primary work surface can be extended 20" above the desk
- Gas assisted single paddle infinite height adjustment range of 13.8"
- 42" large primary work surface, fits 2 x 27" monitors,
  KV monitor arms, Apple iMac or laptop with monitor
- Three grommet holes for monitor arm or cable management
- 20° keyboard surface tilt, -10°/+10° for ergonomic typing
- Clip-on mouse fence and cable manager
- Supports 45 lbs. of technology
- Fits onto a 24" deep desk
- Ships fully assembled

Ascent3 Height Adjustable Table Frame Kits

A height adjustable table solution for customers who want office ergonomics at a competitive market price. A quiet alternative between sitting and standing positions reducing strain and tension while improving circulation for better health. This simple expandable base design fits a wide array of user tops in various widths and depths and is programmable to 4 memory settings.

Ascent3 - Rectangular 2 leg/3 stage table

Item #	Description	Pack.
11B-45000	Silver, 24” foot size	1

- 26” height adjustable range,
- digital readout programmable memory switch with 4 memory settings
- 58 dB noise level for quiet operation
- 1.2” per second heigh adjustment speed for quick adjustment
- Adjustable to fit table top widths from 42" to 78" wide and 23" to 30" deep (not included)
- Payload carry capacity: 200 lb (after top)
- Gross load capacity 330 lb (not including top and safety factor)
- 8' power cord
- Maximum current draw: 4 A at 120 V/60 Hz
- Standby power: 0.3 W
- Meets or exceeds BIFMA X5.5 standards
- UL recognized controls
- 5 year warranty

* table top not included

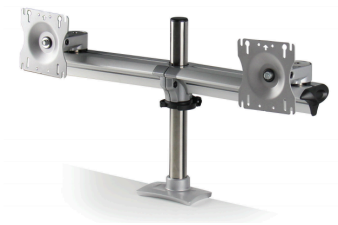
Ascent3 - “L” shaped 3 leg/3 stage table - available early 2024

Item #	Description	Pack.
11B-	Silver, 24” foot size	1

Concerto Monitor Supports

Item #	Description	Pack.
11C-447825S	Monitor Support	1

- dual screen
- beam mount (no extension arms)
- includes two quick connect adapter brackets and 12" pole
- two 10" beam segments
- max 20" screen width



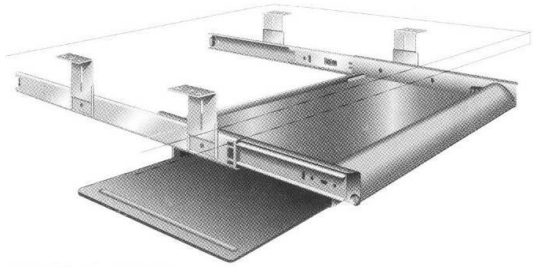
Item #	Description	Pack.
11C-447820SD12	Monitor Support	1

- dual screen
- two dual extension arms each with one standard length fixed segment + one height adjustable segment, joined together with the dual hub
- included two quick connect adapter brackets and 12" pole
- max 39" screen width
- grommet only

Keyboard Tray with Mouse Tray - KV 5710

Item #	Colour	Description	Pack.
11C-40021	Black	KV 5710 SP complete with mouse tray	1 Set

- 3/4 Extension, 75 lb load rating
- 3 precision steel ball bearings per inch of ball race for smooth, quiet movement and durability
- Mounting brackets adjust to seven different heights and can be reversed for inbound or outbound mounting
- Tray lock-in and lock-out. Friction latch holds tray securely in an open position while permitting easy closure
- Tray member quickly disconnects using positive lever release
- Ergonomic, height adjustable cushioned wrist rest (five positions)
- Keyboard tray and mouse tray are cold rolled steel
- Wrist rest is a textured PVC compound
- Mouse tray opens to either left or right side



Adjustable Keyboard Arm/Comfort Keyboard Tray

Item #	Description	Pack.
11C-42025	Adjustable keyboard Arm	1

- 18" track with EZ-Glide system
- Swivel tilt mouse platform accommodates right or left hand mousing

Fasteners

Joint Connector Bolt (JCB-B)

Made of steel with a bronze finish
Installed with a 4mm driver bit or allen/hex key

Item #	Finish	Description
13M-10230	Bronze	Joint connector bolt 1/4-20x30mm
13M-10235	Bronze	Joint connector bolt 1/4-20x35mm
13M-10240	Bronze	Joint connector bolt 1/4-20x40mm
13M-10245	Bronze	Joint connector bolt 1/4-20x45mm
13M-10250	Bronze	Joint connector bolt 1/4-20x50mm
13M-10280	Bronze	Joint connector bolt 1/4-20x80mm
13M-20230	Chrome	Joint connector bolt 1/4-20x30mm
13M-20235	Chrome	Joint connector bolt 1/4-20x35mm
13M-20240	Chrome	Joint connector bolt 1/4-20x40mm
13M-20245	Chrome	Joint connector bolt 1/4-20x45mm
13M-20250	Chrome	Joint connector bolt 1/4-20x50mm
13M-20260	Chrome	Joint connector bolt 1/4-20x60mm
13M-20270	Chrome	Joint connector bolt 1/4-20x70mm

- available in other finishes to special order
- joint connector screws also available

Joint Connector Cap (JCN)

Made of steel with a bronze finish
Designed as a cap nut with JCB-B connector bolt

13P-10212	Bronze	Cap Nut JCN 1/4-20x12mm
13P-10217	Bronze	Cap Nut JCN 1/4-20x17mm
13P-10317	Chrome	Cap Nut JCN 1/4-20x17mm

- available in other sizes and finishes

Allen / Hex Keys

Case hardened steel

Item #	Finish	Description
13P-80400	Black	4mm Drive

Fasteners

Insert Nuts - Type D - Hex drive **with** flange.

A zinc alloy die cast fitting designed to be screwed in by hand tool or machine
Provides superior holding power in all wooden materials
External split thread prevents surface expansion during insertion
Low profile circular flange limits penetration and produces a finished appearance

Item #	Finish	Description
13N-30113	Zinc	Insert Nit D 1/4:20x13mm
13N-30120	Zinc	Insert Nut D 1/4:20x20mm

Insert Nuts - Type E - Hex drive **without** flange.

A zinc alloy die cast fitting designed to be screwed in by hand tool or machine
Provides superior holding power in all wooden materials
External split thread prevents surface expansion during insertion
Ideal for curved surface joints and other applications where a recessed fitting is required

Item #	Finish	Description
13N-40113	Zinc	Insert Nut E 1/4:20x13mm
13N-40120	Zinc	Insert Nut E 1/4:20x20mm
13N-41125	Zinc	Insert Nut E 5/16-18x25mm

Cross Dowel (JRN)

A zinc alloy die cast or steel fitting designed for use as a right angle connector
This fitting with a tapered guide hole to simplify bolt connection
It is extremely torque resistant and ideal in high stress applications such as bed rails.

Item #	Finish	Description
13P-00113	Zinc	Cross Dowel 1/4-20x13mm
13P-00120	Zinc	Cross Dowel 1/4-20x20mm

Rags

Ganzie 100% White cotton knit wiper. Soft, absorbent, low-lint wipers made from cotton knits such as t-shirts and finer knit materials.

Item #	Description	Pack.
14A-30000	White Ganzie Rags,	20# bag

- excellent for general clean up, where colour running or transfer is a concern
- the choice of painters, auto body repair shops, furniture finishing, fiberglass shops, or for any general cleaning application.

Foam Protection

Item #	Description	Pack.
14A-60003	Foam Roll, 36” x 900’	Roll

Dust Masks

Recommended for use when sanding, sawing, grinding, sweeping, woodworking and working with fiberglass insulating particles

Item #	Description	Pack.
14A-40002	KN95	5/Pack

Ear Plugs

Laser Lite uncorded single-use earplugs are made of self-adjusting foam that expands to fit virtually every wearer. The contoured T-shape allows for easy insertion and fit. It's smooth, soil-resistant skin prevents dirt build-up. Vibrant colors make protection visible. Pairs are individually packaged in a polybag.

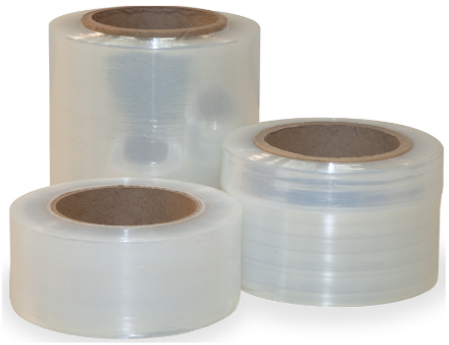
Item #	Description	Pack.
14A-40100	Laser Lite Foam Ear Plugs	Box/200pr.

- ensures worksafe compliance
- NRR 32 - Noise Reduction Rating, one of the highest of any disposable earplug on the market
- easy to wear

Stretch Wrap

Item #	Description	Pack.
14A-10000	3” x 1500’	Roll

- one dispenser included in each case
- dispenser provides instant tension control that saves on film
- high quality, quiet and clear cast stretch film 3" core
- .80mil thick



Pallet Wrap

Item #	Description	Pack.
14A-40001	12.8” x 1476’	Roll

- premium resin blend, and excellent clarity ideal for scanning
- superior strength enables maximum load holding force
- unparalleled strength in lighter gauges, allowing extreme down gauge
- exceptional puncture and tear resistance, superior cling and quiet to unwind
- significant savings per pallet wrapped, minimal film usage maximum yield

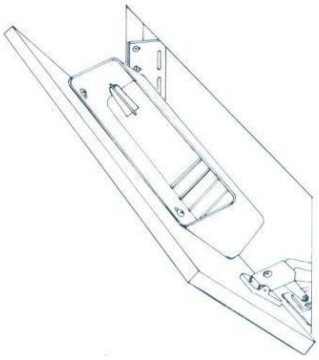
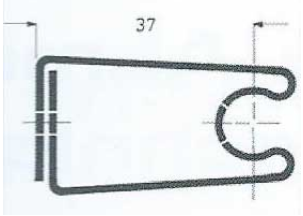
- stainless steel sink front trays available in 10 different lengths
- white sink front trays also available with no ring holder in 10 different lengths

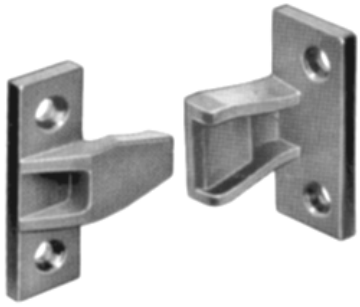


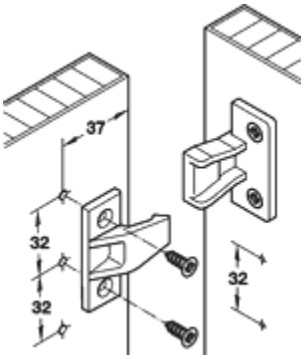
Sink Front Clips

Item #	Colour	Description	Sold By:
03D-40000	Steel	Sink Front Spring Clip	1000
03D-40050	Zinc	Sink Front Dowel 5mm	1000
03D-40055	Black	#6 Screw Mounted Sink Front Clip	1000
03D-40056	Black	Euro Screw Mount Sink Front Clip	1000

- for fastening panels to frames



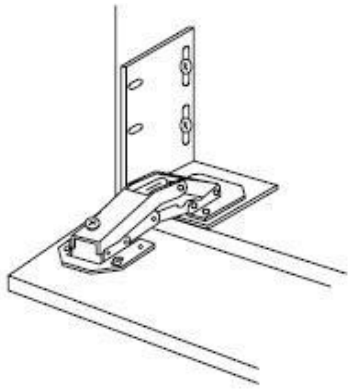




Euro Tray Hinges

Item #	Colour	Description	Code #Sold By:	
15B-41010	Nickel Plated	Sink Front Euro Tray Hinge	ET-H-N	Pair / 10

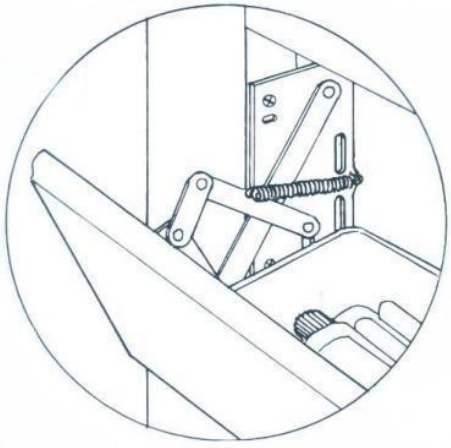
- allows for opening angle of 45° - 90°
- hinge opens flat (90°) for easy installation into existing cabinetry
- mounting plates & hinge mechanism are nickel plated
- hinges open smoothly even on long panel fronts
- fits both frame and frameless cabinets
- mounting holes provided for system 32
- slotted holes to provide adjustment



Scissors Hinges

Item #	Colour	Description	Code #Sold By	
15B-41000	Nickel Plated	Sink Front Scissors Hinge	SH-10	Pair/10

- spring loaded, self-closing, opening angle of 40°
- hinges open smoothly and evenly on any length panel
- fits both frame & frameless cabinets
- mounting holes provided for system 32
- slotted holes to provide adjustment



Tray Divider

Item #	Colour	Description	Code #	Sold By:
15B-20500	White	Tray Divider 12" high	TD12-W	Each / 10
15B-20502	White	Tray Divider 18" high	TD18-W	Each / 10
15C-20500	Frosted Nickel	Tray Divider 12” high	TD12-FN	Each / 10
15C-20502	Frosted Nickel	Tray Divider 18” high	TD18-FN	Each / 10

- easy to install dividers take the work out of creating a partitioned cabinet space
- 15/16" wide x 19-1/2" deep
- units are shipped complete with nylon fittings and screws
- TD-18 works well in base cabinets and TD-12 in upper pantry or oven cabinets where height is restricted

Wood & Wire Tray Divider Roll Out

Item #	Colour	Description	Code #	Sold By:
15B-20520	White	Tray Divider Roll Out 6"	TDRO6-W	Each

- fully assembled unit, easy to install
- Slides out on ½” thick white melamine mounted on epoxy coated roller slides
- 6” wide x 19-1/2” high x 22” deep

Bottle Holders

Item #	Description	Finish	Pack.
15C-71001	Single Bottle Peg	Black, Champagne Gold, Satin Chrome	Set
15C-71002	Double Bottle Peg	Black, Champagne Gold, Satin Chrome	Set
15C-71003	Triple Bottle Peg	Black, Champagne Gold, Satin Chrome	Set

- 3 lengths available for holding 1, 2, or 3 bottles
- available in black, champagne gold and satin chrome
- screw-in

Item #	Description	Finish	Pack.

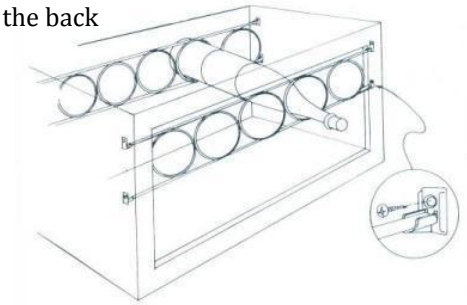
Item #	Description	Finish	Pack.
15C-72362	5 Ring Wine Rack	Frosted Nickel	5
15C-72962	6 Ring Wine Rack	Frosted Nickel	5

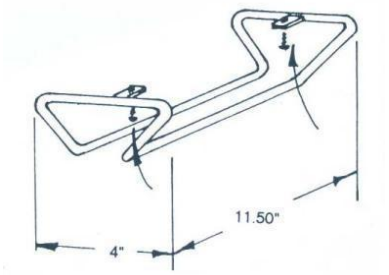
- easy to install. all mounting fittings are included
- two racks are required per installation, one in front & one parallel with it in the back



Stemware Holder

Item #	Finish	Description	Pack.
15B-70150	Brass	Single Row Stemware Holder	10

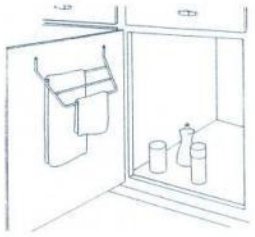
- open at both ends for access from either side
- may be placed end to end for island and certain bar applications
- 2" high



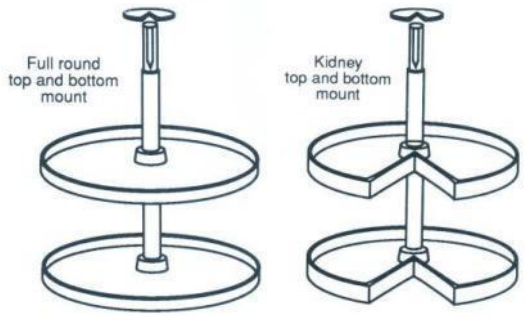
Towel Bars

Item #	Colour	Description	Code #
15B-20600	White	Towel bar	TB-W
15B-20622	Anochrome	3 prong towel bar pull out	P793-ANO

- TB-W: durable epoxy coated rack (also available in frosted nickel)
- P793-ANO includes friction free ball bearing carrier
- mounts to either left or right hand side of cabinet
- 15B-20622 available by special order



Lazy Susans - Poly

Item #	Code #	Description	Pack.
15B-36024	PFN24ST-W	24" Full Round Polystyrene Susan	1 Set
15B-36028	PFN28ST-W	28" Full Round Polystyrene Susan	1 Set
15B-36032	PFN32ST-W	32" Full Round Polystyrene Susan	1 Set
15B-35024	PKN24ST-W	24" Kidney Polystyrene Susan	1 Set
15B-35028	PKN28ST-W	28" Kidney Polystyrene Susan	1 Set
15B-35032	PKN32ST-W	32” Kidney Polystyrene Susan	1 Set


- shelves are made of polymer (double wall rim and strengthening ribs)
- height range 25-1/2” - 31-1/2”
- mounting top and bottom
- bottom mount only available in 18" and 20" on special order
